

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# ADVERTISEMENT.

**T**HAT a *complete and correct Catalogue* of Modern Books is much wanted, will be generally admitted; how far the *London Catalogue* answers to that description, may be determined by comparing it with the following account, which the Proprietor submits to the Public.

It is near six years since the last *Modern Catalogue* was published: All the New Books from that time have been constantly taken from the public papers, as they appeared; and New Editions, with any alterations in the Size, Price, or any other particulars, have been carefully noted.

A great number of articles published before that time, but omitted in all the Catalogues, are inserted from the *Reviews*, which have been consulted, and every article in them examined, from their first publication. At the same time, where any article was not sufficiently known to the Proprietor, enquiry has been made after the Size and Price of the last edition; which has likewise been observed when the Review and the Catalogue differed in any respect in their account of the same book.

Many Books (some of them very considerable) not published either in the Papers or Reviews, may likewise be found in this Catalogue.

Many repetitions in the former Catalogue, of the same articles under different Alphabets and Titles, have been discovered and avoided; and the Proprietor has endeavoured to place every Book under the Alphabet it is most likely to be searched for in.

Innumerable errors in the Prices, Sizes, and Titles, have been corrected throughout.

The plan of this Catalogue is entirely new: the whole regularly digested, and the books are classed under their proper heads; by this means every article may be easily found in much less time; and those gentlemen or ladies who are desirous of making a collection of books, suited to their own taste or profession, may see in a short time all the books in any branch or branches of literature. In this division of the subjects, a particular regard has been had to the arrangement of the heads in such a manner, that those articles which have an obvious connection, may be found nearest to each other; a particular which will have its use to the bookseller or correspondent, when the title given does not sufficiently ascertain the subject.

There are in the whole upwards of fifteen hundred books that have never been in any other Catalogue.
